Bryan:

If you order 4 tons (3636 kg) of HRS from China, it costs you 575/ton. A ton makes approx 909 kg. So, the raw cost is .63 per kg. Shipping charge on that would be 3150.00, which makes the delivered price be about 1.50 per kg.

If you order 11 tons (9999 kg) of WMS from china, it costs you 420/ton. A ton makes approx 909 kg. So, the raw cost is .46 per kg. Shipping charge on that would be 1650.00, which makes the delivered price per kg be .62 per kg.

What kg cost is being used for the HRS?
